FLEET INSURANCE

Fleet insurance provides a single policy for multiple cars, vans and drivers. If you are running a business, it makes life a lot easier, removing the need for scores of individual policies with different insurers and various renewal dates. Not only does it make cover easier to manage with just one renewal date and one premium to pay, having a single policy it can also be more cost-effective, with discounts available for more than one vehicle.

One of the big advantages of fleet insurance is its flexibility, enabling drivers to drive various vehicles at different times rather than restricting them to particular vans, trucks or cars, while new vehicles added to the fleet are automatically covered. It makes running your business much easier, while at the same time can save you money.

SPF Private Clients has a team of experienced insurance brokers who can help you manage and control your vehicle operations. We will help you identify the right policy for your particular business. We offer you a dedicated account handler, helping build trust and understanding of your business and ensuring you get the most flexible product options to suit your needs.

We can ensure that your valuable assets are protected, with the best policy to suit your particular needs at a competitive price.

For your convenience, we can also arrange quick turnaround of cover, where possible quoting and insuring on the same day. There is easy issuance of documentation while policies are easy to update and amend if your business requirements change.

SPF Private Clients can create a fleet policy tailored to suit the demands and needs of the vehicle type and use which can also include cover for goods in transit. We work with a panel of leading insurance providers and we are on hand to guide you through the process from start to finish.
